SECTION A. INVESTOR T&Cs

1. DIRECTORY SERVICES

The Site is intended to provide you with certain information from Issuers regarding the self-certification of their Products as labelled covered bonds. The requirements of the Covered Bond Label Convention are intended to increase transparency, improve investor access to information, and improve liquidity in covered bonds, but they are not a substitute in any way for each User's independent investment and credit evaluation.

The Product Information on this Site is provided for your convenience only, and does not constitute any form of credit rating, an offer to sell (or the solicitation of an offer to purchase) any Product, nor does it constitute a recommendation, or investment advice (or any other type of advice) upon which reliance should be placed.

Inclusion of Product Information in the directory on the Site does not constitute a warranty or representation by us that the Product is a covered bond product or complies with any particular criteria or regulations.

Completion of the relevant self-certification automated process by the Issuer will lead to the grant of the Covered Bond Label. The grant of such label is entirely within the control of the relevant Issuer, and we do not independently verify whether such Issuer complies with the relevant criteria. The existence of a Covered Bond Label does not represent any opinion by us about the creditworthiness of a Product, the value or price of a Product, the appropriateness of a Product's terms, or the Product's future investment performance. Nothing contained on this Site is intended to predict or project future performance.

We make no representation that the Products which are featured on the Site are suitable for you and we disclaim all liability and responsibility arising from any reliance placed on any Product Information or on the Covered Bond Label by any visitor to the Site, or by anyone who may be informed of any of its contents.

From time to time we may make changes to the Site that we feel are appropriate (see Section C, para 3 below).

	Harmonised Transparency Template - Frequently Asked Questions
ieneral Questions	
uestion 1: What is the s	tructure of the Harmonised Transparency Template (HTT)?
Response 1	The HTT contains 5 main worksheets (A, B1, B2, B3 and C). The first worksheet (A) includes the HTT general information. The second worksheet (B1) presents the mortgage information. The third worksheet (B2 contains the public sector information. The fourth worksheet (B3) contains shipping information. The fifth worksheet (C) represents the HTT glossary, which has a harmonised section across jurisdictions the tobust also a section for national specificities below. Any additional tabs (D, E, etc.), will contain the National Transparency Template (NTT) information where relevant.
uestion 2: Is the HTT go	ing to replace the National Transparency Template (NTT)?
Response 2	The HTT is compulsory in order to be considered Covered Bond Label compliant. The NTT can be added in order to provide further information at national discretion.
uestion 3: What is the r	eporting frequency of the HTT?
Response 3	The reporting of the HTT is the same as the reporting of the National Transparency Template (NTT), i.e. at least quarterly.
uestion 4: Where shoul	i the HTT be posted?
Response 4	The HTT should be posted in the same location as the National Transparency Template (NTT) is currently posted, i.e. on the issuer's website. There is no common platform for the HTT.
uestion 5: In what form	at the HTT should be disclosed?
Response 5	The HTT should be disclosed in Excel format in so far as it is possible, as already suggested by the Label Advisory Council and investors. Where issuers are currently providing the Template in both Excel and PDI formats, they are encouraged to continue to do so.
uestion 6: Where can I j	find the reporting date?
Response 6	The reporting date can be found in the Introduction Tab and in the "Basic Facts" section of worksheet A.
uestion 7: What happe	ns when I cannot complete a section of the HTT?
Response 7	When the information is either (i) not applicable for the jurisdiction, (ii) not relevant for the issuer and/or CB programme at the present time; or (iii) not available at the present time; issuers are kindly requested to include ND1, ND2 or ND3 respectively.
pecific Questions	
uestion 8: Does the Har	monised Transparency Template only contain disaggregated information for mortgages and public sector?
Response 8	Indeed, the HTT only provides disaggregated information for mortgage and public sector assets which represent 99.6% of total outstanding. Information in more detail on other collateral types can always be included in worksheet E, which may contains the National Transparency Template (NTT).
uestion 9: How should t	he "liquid assets" be calculated in the section 3 "General Cover Pool / Covered Bond Information" of the HTT?
Response 9	Liquid assets are defined as central bank eligible assets, substitute and other marketable assets. This total is calculated over both outstanding covered bonds and outstanding cover assets.
uestion 10: How should	the "expected" and "contractual" columns of the "Cover pool amortisation profile" be understood?
Response 10	Contractual maturities assume no prepayment scenario unlike expected maturities. Jurisdictions/issuers publishing the two should disclosed their prepayment assumptions for the latter.
uestion 11: How should	the hedging columns included in section 3 "General Cover Pool / Covered Bond Information" of the HTT be understood?
Response 11	The currency breakdown before/after hedging aims to assess the potential currency mismatch on the asset and liability sides. This is supplemented by explanations on the issuer's hedging strategy in the Harmonised Glossary.
uestion 12: How should	the cover assets and covered bonds distribution by currency be populated in section 3.6 and 3.7 in Tab A. HTT General?
Response 12	In the columns titled "Nominal [before hedging]" and "Nominal [after hedging]" if there is no hedging activity also the amounts for the single currencies should be the same in the two columns. Should there be hedging activity then the currency into which the outstanding has been swapped will receive the respective amount. For example, if all outstanding have been swapped into one currency, only this currency will see a positive amount in the after hedging section. The sum of the columns must match the figures reported under "Total Cover Assets", respectively "Outstanding Covered Bonds" in Section 3.1 of Tab A. HTT General.
uestion 13: How should	the covered bonds distribution by interest rate be populated in section 3.8 in Tab A. HTT General?
Response 13	In the columns titled "Nominal [after hedging]", all amounts must be inserted in the line for the interest rate type they have been swapped into. For example, if all outstanding amounts have been swapped int floating rate, only this line should be filled. Total amounts should show the same figures both before and after hedging.
uestion 14: How should	arrears be populated in Tab E. Optional ECB-ECAIs data?
Response 14	Performing loans should be excluded from the "1-<30 days" bucket. If a loan is in arrears, please report the entire principal amount for the loan, not just the instalment that is in arrears.

The issuer believes that, at the time of its issuance and based on transparency data made publicly available by the issuer, these covered bands would satisfy the eligibility criteria for Article 14(2) of the Covered Band Directive (EU) 2019/2162. It should be noted, however, that

whether or not exposures in the form of covered bonds are eligible to preferential treatment under Regulation (EU) 575/2013 is ultimately a matter to be determined by a relevant investor institution and its relevant supervisory authority and the issuer does not accept any responsibility in this regard.

The loan type was introduced in Denmark in 1982. All Danish index loans have index semi-annual payment dates (January 1st and July 1st). Index loans are offered as cash loans. The maturity depends on the loan type. Especially the maturity for subsidized housing depends on the size of the future inflation rate. Fixed-rate loans: The long-term—typically 30-year—fixed-rate, callable loan is considered the most traditional mortgage loan. With this loan, the borrower knows in advance the fixed repayments throughout the term of the loan. The long-term—typically 30-year—fixed-rate appropriate payment option which may be exercised in two ways, i.e. the borrowers may prepay their outstanding debt at a price of 100 (par) or the borrowers may purchase the underlying bonds in the financial markets and deliver them to the mortgage bank. This loan type is also offered with interest-only periods. Adjustable-rate mortgages (ARMs) were introduced in 1996 and the main advantage of ARMs is that interest rates are generally lover than those of fixed-rate loans when raised. The interest rate is generally rest at a frequency of 1, 3, 5 or 10 years and the underlying bonds are replaced by new bonds. The yield of the new bonds determines the loan rate for the period until the next interest rate reset. The lower initial loan rate should therefore be weighed against the risk that it will increase during the loan term. An ARM may be prepaid at a price of 100 in connection with each interest rate reset. Alternatively, the borrower may prepay the loan by purchasing the bonds on market terms—as with all mortgage loans. This loan type is also offered with interest-only periods. Money market based loans: The loan rate changes at generally three or six months. In addition, this loan type differs from ARMs as this interest rate depends on a reference rate, ie an interest rate which is quot
