

Updated: 3 March 2020

When calculating the amounts of mortgage covered bonds to be put on auction for the refinancing of FlexLån® as of 1 April 2020 we see that a number of loans are redeemed, reducing the amounts to be put on auction.

This movement is far from unusual.

The below figures illustrate the loan products that these mortgages are remortgaged into. A large part remain undecided. This is not uncommon as the new loan is not disbursed until end March - and since only few customers enter into fixed rate agreements, only few registrations are made on the new loan prior to disbursement.

As we get closer to 1 April 2020 the share of undecided should decrease.
