Overview, First Half 2016

- The Realkredit Danmark Group recorded a net profit of DKK 2,070 million in the first half of 2016, against DKK 2,057 million in the first half of 2015. The profit for the first half of 2016 was supported by a low level of impairments, while the profit in the same half of 2015 was supported by income from strong remortgaging activity.
- Impairments amounted to DKK 83 million in the first half of 2016, against DKK 319 million in the first half of 2015.
- As announced in May, effective from 1 October 2016, Realkredit Danmark will adjust its administration margin on F1-F4 FlexLån® loans, as both the authorities and Realkredit Danmark wish to reduce the volumes of these loans at the refinancing auctions in order to ensure that the Danish mortgage credit system remains robust. Prices on all fixed-rate loans and a number of other loan products, including FlexKort® and FlexLån® F5, will remain unchanged.
- The proportion of interest-only loans fell from 38.1% at 30 June 2015 to 36.8% at the end of June 2016.
- Realkredit Danmark still expects the profit for 2016 to be at the same level as in 2015.

Mortgage credit market

There was a rising trend in house prices at the beginning of 2016, and as in recent years the biggest price increases were seen in owner-occupied flats, whereas price developments were more subdued in the market for single-family houses. In the first half of 2016, the price increases spread to most parts of Denmark.

Trading activity in the housing market was stagnant to slightly decreasing in the first part of 2016 relative to the latter part of 2015. However, trading activity is still relatively strong compared with the past five years.

The housing market remains underpinned by very low interest rates, rising disposable household income and labour market improvements. However, economic growth has been relatively subdued for the past 12 months or so, and the economic recovery remains fragile. Overall, Realkredit Danmark expects price increases of owner-occupied dwellings to the tune of 3-4% in 2016, against approximately 6% in 2015.

Trend in interest rates past 12 months

In the commercial property market, activity has picked up in 2016 relative to an already high level of activity in 2015. This development is driven by factors such as very low interest rates and growing interest from Danish and international investors.

Results

Realkredit Danmark recorded a net profit of DKK 2,070 million in the first half of 2016, against DKK 2,057 million in the same period of last year. The profit performance was attributable primarily to lower impairments, which were largely offset by lower income from remortgaging activity.

The administration margin was unchanged.

Lower income from remortgaging activity triggered a decline in net interest income.

Income from the investment portfolio fell 25% because this income in the first half of 2015 benefited from income deriving from the high level of remortgaging activity.

Expenses were at an unchanged level. Exclusive of provisions for payments to the Resolution Fund of DKK 28 million, expenses fell 7%. Among other things, this was due to lower remortgaging activity.

Impairments fell to DKK 83 million in the first half of 2016 from DKK 319 million in the same period of 2015. Total impairments declined as a result of a general improvement of macroeconomic conditions in Denmark and reversal of previous impairments on corporate customers. In other words, the positive trend of the fourth quarter of 2015 continued into the first half of 2016. However, due to low selling prices, especially pork and milk prices, the agricultural sector is facing the challenge of falling prices of agricultural property. As a result, it was necessary to increase impairments on the agricultural segment in the first half of 2016. Impairments equalled 0.02% p.a. of total mortgage lending, against 0.06% in 2015. At the end of June 2016, the delinquency rate was slightly lower than in 2015, except for the agricultural segment.

The tax charge totalled DKK 584 million. The effective tax rate for the period was 22.0%.

Balance sheet

Gross lending amounted to DKK 47 billion, against DKK 103 billion in the first half of 2015. Mortgage lending at fair value rose DKK 15 billion to DKK 760 billion. The development in mortgage lending at fair value is composed of an increase in the nominal outstanding bond debt of DKK 4 billion and an DKK 11 billion increase in the market value adjustment in the same period.

In the first half of 2016, 1-year and 2-year FlexLån® loans represented 9% of gross lending, against 5% in 2015.

Loan portfolio - development in 1 and 2-year FlexLån® loans

The decline in the volume of 1-year FlexLån® loans ended towards the end of 2015, and the total volume of 1-year FlexLån® loans rose DKK 2 billion in the first half of 2016 to DKK 69 billion.

At 30 June 2016, the average loan-to-value (LTV) ratio stood at 65%, which was unchanged compared to the end of 2015. An increase in loans calculated at market value was offset by rising property prices.

The number of new foreclosures was 39 in the first half of 2016. The number of foreclosures fell marginally in the first half of 2016 to 56 at the end of June 2016, of which 44 were owner-occupied dwellings and 12 were commercial properties. The value of the foreclosures was DKK 98 million.

Issued mortgage bonds rose DKK 20 billion to DKK 765 billion. The nominal value of issued bonds was DKK 745 billion, which was DKK 9 billion more than at the end of 2015. The amounts are exclusive of holdings of own mortgage bonds. In the first half of 2016, Realkredit Danmark issued bonds for DKK 47 billion, not including bonds issued for the refinancing auctions.

Capital and solvency

At the end of June 2016, shareholders' equity stood at DKK 47.4 billion, against DKK 48.7 billion at end-2015. The ordinary dividend payment of DKK 3.5 billion and the consolidation of the net profit for the period accounted for the change.

Realkredit Danmark's total capital amounted to DKK 46.1 billion, and the total capital ratio calculated in accordance with the Capital Requirements Regulation and Directive (CRR/CRD IV) was 32.5%. At 31 December 2015, the corresponding figures were DKK 45.8 billion and 38.8%, respectively.

Realkredit Danmark uses the internal ratings-based (IRB) approach to calculate the risk exposure amount for credit risks. The total risk exposure amount (REA) was DKK 141.6 billion at 30 June 2016, against DKK 118.1 billion at the end of 2015. The increase was due primarily to a methodology change of the Danske Bank Group's IRB models, which took effect in the first quarter of 2016.

Calculated on the basis of the transitional rules of the CRR/CRD IV, the capital need for 2016 must, as a minimum, amount to 80% of the requirement calculated under the previous rules, corresponding to DKK 26.8 billion and a solvency need ratio of 18.9%. Realkredit Danmark thus has a capital buffer of DKK 19.3 billion.

Under Danish law, Realkredit Danmark must publish its total capital and solvency need on a quarterly basis. The rd.dk site provides further information.

Supplementary collateral

Realkredit Danmark issues mortgage-covered bonds. Under Danish law, it must provide supplementary collateral to the bondholders when the LTV ratio exceeds predefined limits, which are 80% for residential property and 60% for commercial property.

At the end of June 2016, the requirement for supplementary collateral for mortgage-covered bonds was DKK 29.3 billion, against DKK 33.9 billion at end-2015.

Liquidity Coverage Ratio

The effective requirement for Realkredit Danmark's buffer of liquid assets resulting from the Liquidity Coverage Ratio is 2.5% of Realkredit Danmark's total mortgage lending. At the end of June 2016, this corresponded to DKK 19 billion. With liquid assets of DKK 51 billion, Realkredit Danmark has a buffer of DKK 32 billion relative to the requirement.

Price increases on FlexLån® F1-F4 loans

Realkredit Danmark has given notice of price increases on its F1, F2, F3 and F4 FlexLån® loans effective from 1 October 2016.

The authorities and Realkredit Danmark aim to reduce the size of the refinancing auctions in order to continue to safeguard a robust mortgage credit system in Denmark. Customers affected by the price increases will be offered the opportunity to refinance to another loan type such as FlexKort® or fixed-rate loans without paying any fees.

Supervisory diamond for mortgage credit institutions

Realkredit Danmark currently complies with all threshold values. However, given the current demand for loans with short refinancing intervals, it will be difficult to comply with all of the threshold values in the years to come.

The notified price increases on F1-F4 FlexLån® loans are expected to ensure that Realkredit Danmark will continue to comply with the supervisory diamond's refinancing volumes, which will otherwise be challenged by the existing loan portfolio.

Future rules

Realkredit Danmark continues to monitor developments in the Basel Committee's proposed amendments to the capital calculation models that will replace the transitional rules when they expire in 2017. The wording of the final rules remains subject to a high degree of uncertainty.

Rating

Realkredit Danmark's mortgage bonds and mortgage-covered bonds issued from capital centres S and T and under the Other reserves series still hold a AAA rating from Standard & Poor's. Furthermore, bonds issued from capital centre S hold a AAA rating from Fitch Ratings, while bonds issued from capital centre T hold a AA+ rating from the same agency. Realkredit Danmark holds an issuer rating of A from Fitch Ratings.

Outlook for 2016

Realkredit Danmark expects that economic growth will remain moderate in Denmark in 2016. Interest rates in Denmark are expected to remain low for the rest of 2016, supporting activity in the Danish housing market.

Realkredit Danmark expects income to remain unchanged, supported by marginally higher administration margin income following the adjustment of administration margins on FlexLån® F1-F4 loans, while a decline in income from remortgaging activity will have downward effect.

As a result of the full-year effect of payments to the Resolution Fund, total expenses are expected to rise. Expenses exclusive of payments to the Resolution Fund are expected to fall as a result of lower remortgaging activity and focus on cost control.

Loan impairment charges are expected to be slightly lower than in 2015.

Realkredit Danmark therefore still expects the profit for 2016 to be at the same level as in 2015.

Tier 1 capital ratio (%)	32.0	38.3	35.8
Total capital ratio (%)	32.5	38.8	36.3

Total capital and the total risk exposure amount at 30 June 2016 have been calculated in accordance with the rules applicable under the CRR/CRD IV taking transitional rules into account as stipulated by the Danish FSA. A new filter has been introduced for deduction from common equity tier 1 capital of additional value adjustments of assets and liabilities measured at fair value (prudent valuation). The European Commission has approved the standard submitted by the European Banking Authority (EBA), which has been adopted from February 2016.

The solvency need calculation is described in more detail on rd.dk.

Notes – Realkredit Danmark Group

Note

1 Significant accounting policies

and critical accounting estimates and assessments

Realkredit Danmark's interim report for the first half of 2016 has been prepared in accordance with IAS 34, Interim Financial Reporting, as adopted by the EU, and additional Danish disclosure requirements for interim reports of issuers of listed bonds.

The Group has not changed its significant accounting policies from those followed in Annual Report 2015, which provides a full description of the significant accounting policies.

Significant accounting estimates and assessments

Management's estimates and assumptions of future events that will significantly affect the carrying amounts of assets and liabilities underlie the preparation of the Group's consolidated financial statements. The amount most influenced by critical estimates and assessments is the fair value measurement of mortgage loans.

The estimates and assumptions are based on assumptions that management finds reasonable but which are inherently uncertain and unpredictable. The premises may be incomplete, unexpected future events or situations may occur and other parties may arrive at other estimated values.

Fair value measurement of mortgage loans

The fair value of mortgage loans is based on the fair value of the underlying issued mortgage bonds adjusted for changes in the fair value of the credit risk on borrowers.

For mortgage loans granted to customers in rating categories 10 and 11 (loans with objective evidence of impairment), such adjustment is made to the amount which the borrower is expected to be able to repay after a financial restructuring. Loans are written down to the fair value of the collateral if financial restructuring is not possible or in case of assets financing.

A collective assessment also determines the need for changes to reflect fair value adjustments of the credit risk of the remaining portion of the portfolio. No changes are made if it is possible to raise the administration margin on loans (credit margin) sufficiently to compensate for the higher credit risk and market risk premiums on mortgage loans. If it is not possible to raise the administration margin sufficiently or at all, a collective adjustment is made, reflecting trends in expected losses, unexpected losses (volatility) and the possibility of raising administration margins in the future. The expected future cash flows are discounted at the current market rate with the addition of a risk premium.

Realkredit Danmark's principal risks and external factors that may affect Realkredit Danmark are described in more detail in Annual Report 2015.

The interim report has not been reviewed or audited.

Mortgage finance encompasses property financing services provided in Denmark, Sweden and Norway to personal and business customers. The mediation of property financing services is made through Danske Bank's branch network and finance centres and through Corporate & Institutional Mortgage Finance at Realkredit Danmark. The segment also includes mediation of real estate transactions in Denmark offered through the "home" real-estate agency chain. Under the Danish Financial Business Act, at least 60% of the total capital of a mortgage credit institution must be invested in bonds, etc. Own holdings comprise the net return on the part of the securities portfolio not relating to the mortgage finance business. Income from trading activities and own holdings is carried in the income statement under net interest income and value adjustments, etc. In the consolidated highlights, this income, except for interest on bonds at amortised cost, is reclassified to income from investment portfolios. Realkredit Danmark has no branch offices or subsidiaries outside Denmark.

Fair value hedging of interest rate risk	60	85
Premium/discount	7	14
Total issued bonds	17,639	17,721

	1 January 2016	Issued	Redeemed	30 June 2016
Nominal value				
Total issued bonds	17,622	-	50	17,572

Issued bonds at amortised cost consist of issued senior debt.

6 Assets deposited as collateral

At 30 June 2016, Realkredit Danmark had deposited securities worth DKK 7,847 million (end-2015: DKK 9,410 million) as collateral with the Danish central bank.

In connection with repo transactions, which involve selling securities to be repurchased at a later date, the securities remain on the balance sheet, and amounts received are recognised as due to credit institutions and central banks. Repo transaction securities are treated as assets provided as collateral for liabilities. At 30 June 2016, the carrying amount of such securities totalled DKK 17,942 million (end-2015: DKK 16,567 million). Counterparties are entitled to sell the securities or deposit them as collateral for other loans.

At 30 June 2016, mortgage lending totalling DKK 759,785 million and other assets totalling DKK 29,285 million (end-2015: DKK 744,383 million and DKK 33,859 million) were registered as security for issued mortgage bonds, including mortgage-covered bonds, and issued bonds at amortised cost.

	Total	745,223	41	-	745,264

Negative interest income and interest expenses due to negative interest rates were insignificant during the first six months of 2016. The amounts are offset against interest income and interest expenses, respectively.

Note 36 to Annual Report 2015 provides a description of the valuation techniques used for financial instruments. Financial market developments did not result in reclassification of bonds between listed prices and observable input during the first six months of 2016.

8 Contingent liabilities

Owing to its size and business volume, Realkredit Danmark Group is continually a party to various disputes. The Group does not expect the outcomes of the disputes pending to have any material effect on its financial position.

As the sponsoring employer, Realkredit Danmark is liable for the pension obligations of Kreditforeningen Danmarks Pensionsafvklingskasse. The pension fund and the Group's defined benefit plan have not accepted new members since 1971.

In connection with implementation of the EU Bank Recovery and Resolution Directive, a Danish resolution fund has been established. The resolution fund must amount to 1% of the covered deposits of all Danish credit institutions by 31 December 2024. The first contribution to the fund was made at 31 December 2015. The individual institution must make contributions to the fund on the basis of its size and risk relative to other credit institutions in Denmark. The contribution for 2016 of a little over DKK 50 million will be accrued over the four quarters of the year. The intention is that losses should be covered by the annual contributions made by the participating credit institutions. If sufficient means are not available in the resolution fund, extraordinary contributions can be required of up to three times the latest annual contribution.

The company is registered jointly with all major Danish subsidiaries of the Danske Bank Group for financial services employer tax and VAT, for which it is jointly and severally liable.

The company is jointly taxed with all Danish companies in the Danske Bank Group and are jointly and severally liable for their Danish income tax, withholding tax, etc.

Guarantees and indemnities issued by the Group, irrevocable loan commitments regarding reverse mortgages and other commitments not recognised in the balance sheet amount to:

(DKK millions)	30 June 2016	31 December 2015	30 June 2015
Other contingent liabilities			
Irrevocable loan commitments regarding reverse mortgages	12	22	27
Other commitments	94	91	90
Total	106	113	117

In addition to credit exposure from lending activities, loan offers made by the Group amounted to DKK 31,521 million (end-2015: DKK 24,088 million). These items are included in the calculation of the total risk amount in accordance with the CRR/CRD IV.

Notes – Realkredit Danmark Group

Note

9 Risk management

The Board of Directors defines Realkredit Danmark's risk management framework, while the Executive Board monitors Realkredit Danmark's risks and ensures compliance with the framework. The principal risk faced by Realkredit Danmark is the credit risk on mortgage loans. Realkredit Danmark has only limited exposure to market risk.

Credit risk

As a mortgage credit institution, Realkredit Danmark provides loans secured on real property. The credit risk on a mortgage loan basically derives from two factors; the risk that the borrower is unable to repay the loan and the expected loss if the customer does not repay the loan. The latter depends largely on the value of the mortgaged property. The table below shows a breakdown of the loan portfolio on customer classification by creditworthiness (rating categories) and loan-to-value (LTV) ratios. Loans to customers with an LTV ratio of more than 80% in the four lowest rating categories total DKK 6 billion, which corresponds to 0.8% of the total loan portfolio.

Portfolio broken down by LTV ratio and rating category

11	2	2	2	1	2	9
Total	274	222	155	68	29	748

In the financial statements, mortgage loans, and thus the associated credit risk, are recognised at fair value. Calculating the fair value of credit risk involves significant estimates and assumptions. This is described in detail in note 1. The total fair value adjustment of credit risk is described in note 4.

Market risk

Market risk comprises interest rate, equity market and exchange rate risks and, to a very limited extent, liquidity risk and operational risk. In addition, the Group is exposed to some degree to pension risk on defined benefit plans for current and/or former employees.

However, the statutory principle of balance eliminates most of the interest rate, exchange rate and liquidity risks on Realkredit Danmark's loans. Realkredit Danmark's other assets and liabilities involve some degree of market risk, mainly in the form of interest rate risk. Realkredit Danmark uses derivatives to hedge the interest rate risk on some of the bonds in the proprietary portfolio and on fixed-rate liabilities in the form of issued senior debt. The derivatives and the hedged bonds are recognised at fair value, and fair value hedge accounting is used to the effect that the hedged interest rate risk on the issued senior debt is also recognised at fair value in the financial statements. Realkredit Danmark has placed DKK 30,044 million of its proprietary portfolio in fixed-rate bonds, which are recognised in the financial statements as held-to-maturity investments and are thus measured at amortised cost. As a result, Realkredit Danmark knows the return on the portfolio until maturity, and the fixed-rate held-to-maturity portfolio is therefore not considered to entail an interest rate risk that needs to be hedged through derivatives.

The Group's management of credit risk and market risk is described in detail in the risk management note in Annual Report 2015.

Interim financial statements – Realkredit Danmark A/S

Note (DKK millions)

The financial statements of the parent company, Realkredit Danmark A/S, are prepared in accordance with the Danish Financial Business Act and the Danish FSA's executive order no. 281 dated 26 March 2014 on Financial Reports of Credit Institutions and Investment companies, etc.

The rules are consistent with the Group's measurement principles under IFRS with the exception that

- Domicile properties are valued at estimated fair value (revalued amount) through other comprehensive income

The estimated fair value of domicile properties is determined in accordance with the Danish FSA's executive order of Financial Reports for Credit Institutions and Investment Companies, etc. Available-for-sale financial assets are measured at fair value through profit or loss.

The format of the parent company's financial statements is not identical to the format of the consolidated financial statements prepared in accordance with IFRSs.

The table below shows the differences in net profit and shareholders' equity between the IFRS consolidated financial statements and the parent company's financial statements presented in accordance with Danish FSA rules.

At 30 June 2016, the share capital was made up of 6,300,000 shares of DKK 100 each. All shares carry the same rights; there is thus only one class of shares. The company is wholly-owned by Danske Bank A/S, Copenhagen. Realkredit Danmark A/S and group undertakings are included in the consolidated financial statements of Danske Bank A/S, Copenhagen.

The revaluation reserves relate to fair value adjustment of domicile property.

Value adjustment of assets taken over amounted to DKK 0 million at 30 June 2016, against DKK -1 million at end-2015.

Statement by the management

The Board of Directors and the Executive Board (management) have considered and approved Interim Report – First Half 2016 of Realkredit Danmark Group.

The consolidated interim financial statements have been prepared in accordance with IAS 34, Interim Financial Reporting, as adopted by the EU, and the Parent Company's interim financial statements have been prepared in accordance with the Danish Financial Business Act. Furthermore, the interim report has been prepared in accordance with Danish disclosure requirements for interim reports of issuers of listed bonds.

In our opinion, the consolidated interim financial statements give a true and fair view of the Group's and the Parent Company's assets, liabilities, shareholders' equity and financial position at 30 June 2016 and of the results of the Group's and the Parent Company's operations and the consolidated cash flows for the period starting on 1 January 2016 and ending on 30 June 2016. Moreover, in our opinion, the management's report includes a fair review of developments in the Group's and the Parent Company's operations and financial position and describes the significant risks and uncertainty factors that may affect the Group and the Parent Company.
